ROLAND A-300 PRO MIDI KEYBOARD SETTINGS
Follow these instructions to set up and operate the Roland A-300 Pro MIDI Keyboard

Turn Keyboard On:
1. Make sure both ends of the USB cable are plugged in
2. On the left side of the keyboard, move the switch closest to the rear of the keyboard to the “USB” setting (towards the front of the keyboard/towards the USB port)

Changing Octaves:
• In the default setting, C4 (middle C) is the C 2/3 of the way up the keyboard (see image)
  • Press the “Octave +” button to shift the pitch of the keyboard up 1 octave. Note, every time you press this button you will shift the keys up 1 octave to the maximum
  • Press the “Octave -” button to shift the pitch of the keyboard down 1 octave. Note, every time you press this button you will shift the keys down 1 octave to the minimum
  • If the keyboard is set an octave or more ABOVE the default, the “Octave +” button will be lit, if the keyboard is set an octave or more BELOW the default, the “Octave -” button will be lit. If neither button is lit, the keyboard is in the default range
